wiha
Tools that work for you

EN

Wiha – our goal: your success

- **Your guarantee for quality**
  Winner of the Manufacturing Excellence Awards 2014 as the best SME in Germany.
- **Reliable and dependable**
  German family-owned company with more than 75 years of experience.
- **Your advantage**
  Customised problem-solving for professionals.
- **Cutting-edge technology**
  Award-winninga innovations valued by professionals throughout the world.

What makes your work easier?
Tools that increase your efficiency, reduce costs and preserve your health. This is why Wiha develops, designs and manufactures products that meet the highest functionality, durability and ergonomic demands.

Founded over 75 years ago as a small family-owned business for standard parts and screws, Wiha has grown to become a global company with factories all over Europe, Asia and the United States and are still owner-operated by the Hahn family.

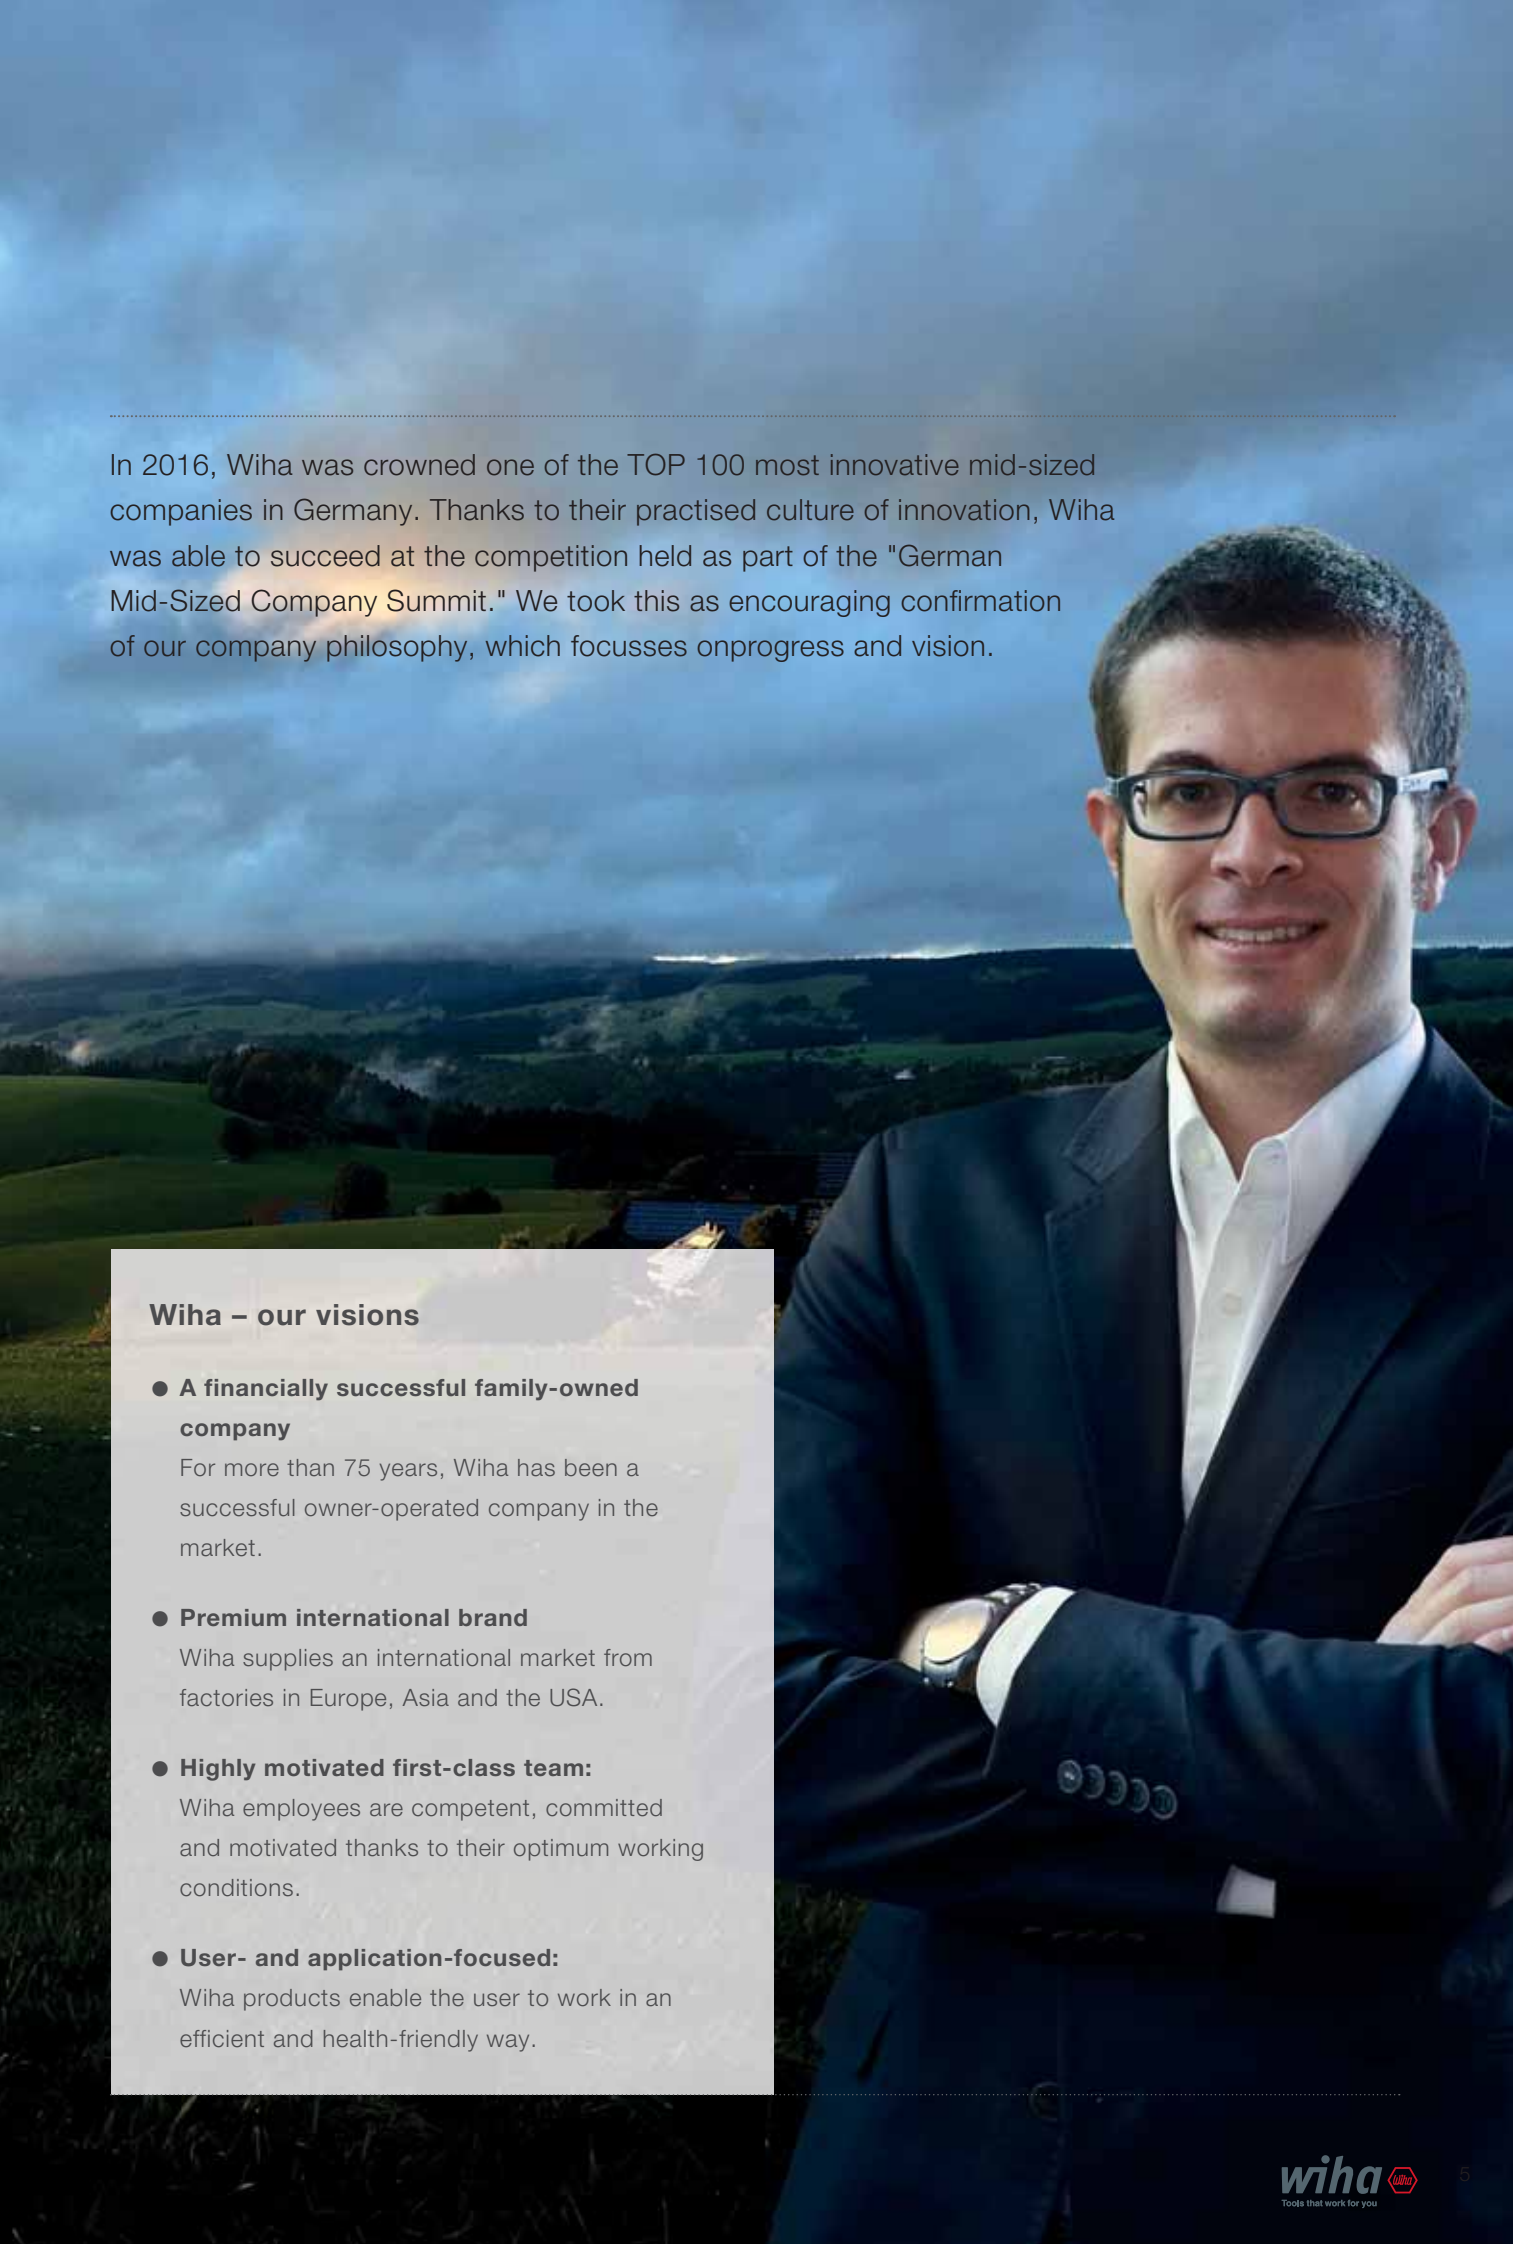
Wiha offers the professional a wide range of high-quality premium tools, characterized by their use of the latest manufacturing technologies, application-oriented innovations, ergonomic superiority, top quality, absolute reliability and long service life. In short, tools that make your work noticeably easier - tools that work for you.

Learn more about Wiha on our website:
www.wiha.com

Wiha visions and values
With responsibility and innovation, Wiha is set for a successful future.

What makes a company successful? Providing excellent products and having a good company culture are key. The high quality of Wiha tools in their form and functionality is confirmed by the many international awards they have received. As an owner-operated family-owned company, we foster a culture of togetherness. From employee development to active customer management, Wiha does everything they can to create optimum working and business conditions and a foundation for sustainable success.

As a member of the BME Compliance Initiative, Wiha complies with a code of conduct which obligates the company to follow business conduct rules, principles of social responsibility and the obligation to promote suppliers, ensuring the lawful behaviour of the company and its employees.



In 2016, Wiha was crowned one of the TOP 100 most innovative mid-sized companies in Germany. Thanks to their practised culture of innovation, Wiha was able to succeed at the competition held as part of the "German Mid-Sized Company Summit." We took this as encouraging confirmation of our company philosophy, which focusses onprogress and vision.

Wiha – our visions

- **A financially successful family-owned company**
  For more than 75 years, Wiha has been a successful owner-operated company in the market.
- **Premium international brand**
  Wiha supplies an international market from factories in Europe, Asia and the USA.
- **Highly motivated first-class team:**
  Wiha employees are competent, committed and motivated thanks to their optimum working conditions.
- **User- and application-focused:**
  Wiha products enable the user to work in an efficient and health-friendly way.

To us, positive feedback from people for whom we make our tools is the most rewarding confirmation of our work. All the same, we can also be more than a little proud when the high ergonomic quality of our products is confirmed at the "highest" level, as many of them have been distinguished with coveted design awards. In addition to this, our company and production quality were also honoured with awards. With this praise and confirmation from every direction, it's no wonder that Wiha are on the right track with ergonomic tool concepts and a future-oriented philosophy.

Wiha tools with AGR approval

The world's first tools awarded the seal of approval for efficient and health-preserving work.

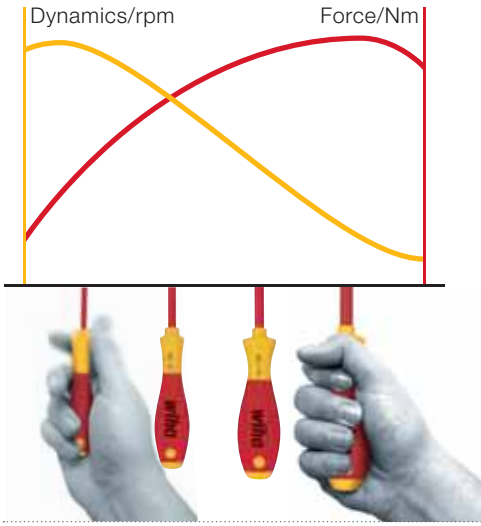
Ergonomic excellence!
Wiha is the world's first hand tool manufacturer to receive the AGR seal for its Inomic® pliers and ergonomic handle design on screwdrivers. This distinction enjoys broad acceptance by medical professionals

Ergonomic excellence - The Wiha screwdriver handle size concept and Wiha Inomic® pliers handle concept. When you are the first hand tool manufacturer in the world to have products distinguished with the renowned AGR quality seal, it's a sensation. Very few everyday objects are able to pass the stringent tests of the AGR, whose seal enjoys broad acceptance by medical professionals for very good reason.

For years, the AGR have been dedicated to promoting and researching the prevention of back pain and they offer recommendations on products which help to prevent musculoskeletal disorders and back pain.

Wiha have now been officially recognised for their ergonomic screwdriver handle size concept and Inomic® pliers handle concept. To us, this distinction is confirmation of our philosophy: To develop tools enabling the professional to not only work efficiently, but also in a health-preserving way. Wiha's screwdriver handle size concept features four handle sizes and lengths, each optimally suited to its respective fastening or work task to ensure healthy work. The angled "pistol handle" of the Wiha Inomic® pliers handle concept relieves the user's wrist while working.

Both handle concepts help users to reduce, or even fully prevent, discomfort in their musculoskeletal system and pain in their joints and muscles. The result? With Wiha, your work is easier, you don't get fatigued as quickly, you work more efficiently and you simply feel better at the end of the working day. As our campaign logo motto goes: "I feel Wiha!"



Wiha SoftFinish® handle sizes
Every Wiha handle optimally balances guidance, speed and torque for the respective fastening task.

Quick-turning - Motor skills are consistently taken into consideration.

Maximum power transmission, comfortable to use and without loss.

VDE-insulated tools from Wiha

To work safer, more efficiently and with less strain on the body.

Certified safety – from our own safety testing procedure according toIEC standards.

Voltage testing: All Wiha VDE-tools, which have special markings, are individually tested at 10,000 V AC and are approved for 1,000 V AC and 1,500 V DC.

Cold shock test: Cooling down to -25° C. The skinning material must retain its toughness, so that it doesn't break when subjected to shock and knocks.

Test of electrical skinning properties: 24 hours storage in water, then 3 minutes test at 10,000 V AC. There must neither be flashover nor disruptive discharge.

Test of the adhesion of the skinning material coating: 168 hours storage at 70° C, then test of adhesion at 500 N.

Pressure tests: Test at 20 N pressure load, 70° C temperature and 5,000 V AC test voltage. No disruptive discharge may occur.

Test of combustion behaviour: The tools are subjected to a flame for 10 seconds. The skinning material must then extinguish and not continue to burn.

Safety note

The following equipment is required for all work on or around live components and should be appropriate for the specific task

- insulating personal protective equipment
- insulated tools
- insulating safety mechanisms

Before starting work, you must disconnect all active, live components of electrical machines and equipment and ensure that they remain disconnected while you carry out the work.

This is achieved by complying with the five safety rules:

- disconnect
- ensure power is switched off
- cover or block off adjacent live components
- secure against reconnection
- earth and short-circuit

As an internationally recognized institute, the VDE is responsible for the testing and certification of electrotechnical products. Wiha provides the professional with a broad range of VDE products, developed and continuously optimized specifically for electricians, which also provide applicationoriented solutions for everyday use.

The Wiha quality-management system according to ISO 9001:2015 ensures that only first-class products are manufactured – and that you can work with products of excellent quality. To ensure maximum safety for the user, the entire Wiha VDE range must undergo the most stringent inspections and individual tests. All Wiha VDE-tools hold multiple certifications: The VDE-GSmark stands for safety with regard to any risk, from electrical right up to radiological. Products labelled with a double triangle and a voltage range are suitable for work with live parts.

The international standard IEC 60900 defines the construction, safety as well as single, series, andrandom testing of insulated tools. But with Wiha you don't just work safer, but also healthier and moreefficiently. Specially developed ergonomic geometries ensure comfortable handling that protectsthe body from strain. The result: easier work, less signs of fatigue, more efficiency.

Further information:

Meets your requirements: Case: robust, large, stable and secure with lid brake. **Lowers your costs:** The correct torque protects material from damage and ensures no additional follow-up work. **Increases your safety:** Internationally award-winning VDE-insulated tools, each individually tested at 10,000 V AC and approved for use at 1,000 V AC. Gas-filled shock absorbers hold the lid in all positions and reduce the risk of injury when closing. **Protects your health:** Wiha pliers require less force and reduce pressure on wrists. Ergonomic handle design makes work easier and prevents occupational illnesses. Trolley with stable in-line rollers allow easy and stress-free transportation of tools to the work area. **Increases your efficiency:** A comprehensive tool assortment, always providing you with the right tool when it is needed. The design and function of the tool trays guarantee quick and easy access to tools. **Increases your flexibility:** Ample space for additional tools and lots of storage for small parts and machines.

VDE-certified tools

Insulated tools are essential for all work on or around live components.

- Wiha VDE-tested tools are subject to stringent safety test procedures.
- All tools with the special marking have been tested at 10,000 V AC and are therefore approved for use at 1,000 V AC and 1,500 V DC.
- Certified by the VDE Testing and Certification Institute and individually tested according to the international standard IEC 60900.

The following equipment is required for all work on or around live components and should be appropriate for the specific task

- insulating personal protective equipment
- insulating safety mechanisms
- insulated tools

Before starting work, you must disconnect all active, live components of electrical machines and equipment and ensure that they remain disconnected while you carry out the work.

This is achieved by complying with the five safety rules:

- disconnect
- secure against reconnection
- ensure power is switched off
- earth and short-circuit
- cover or block off adjacent live components

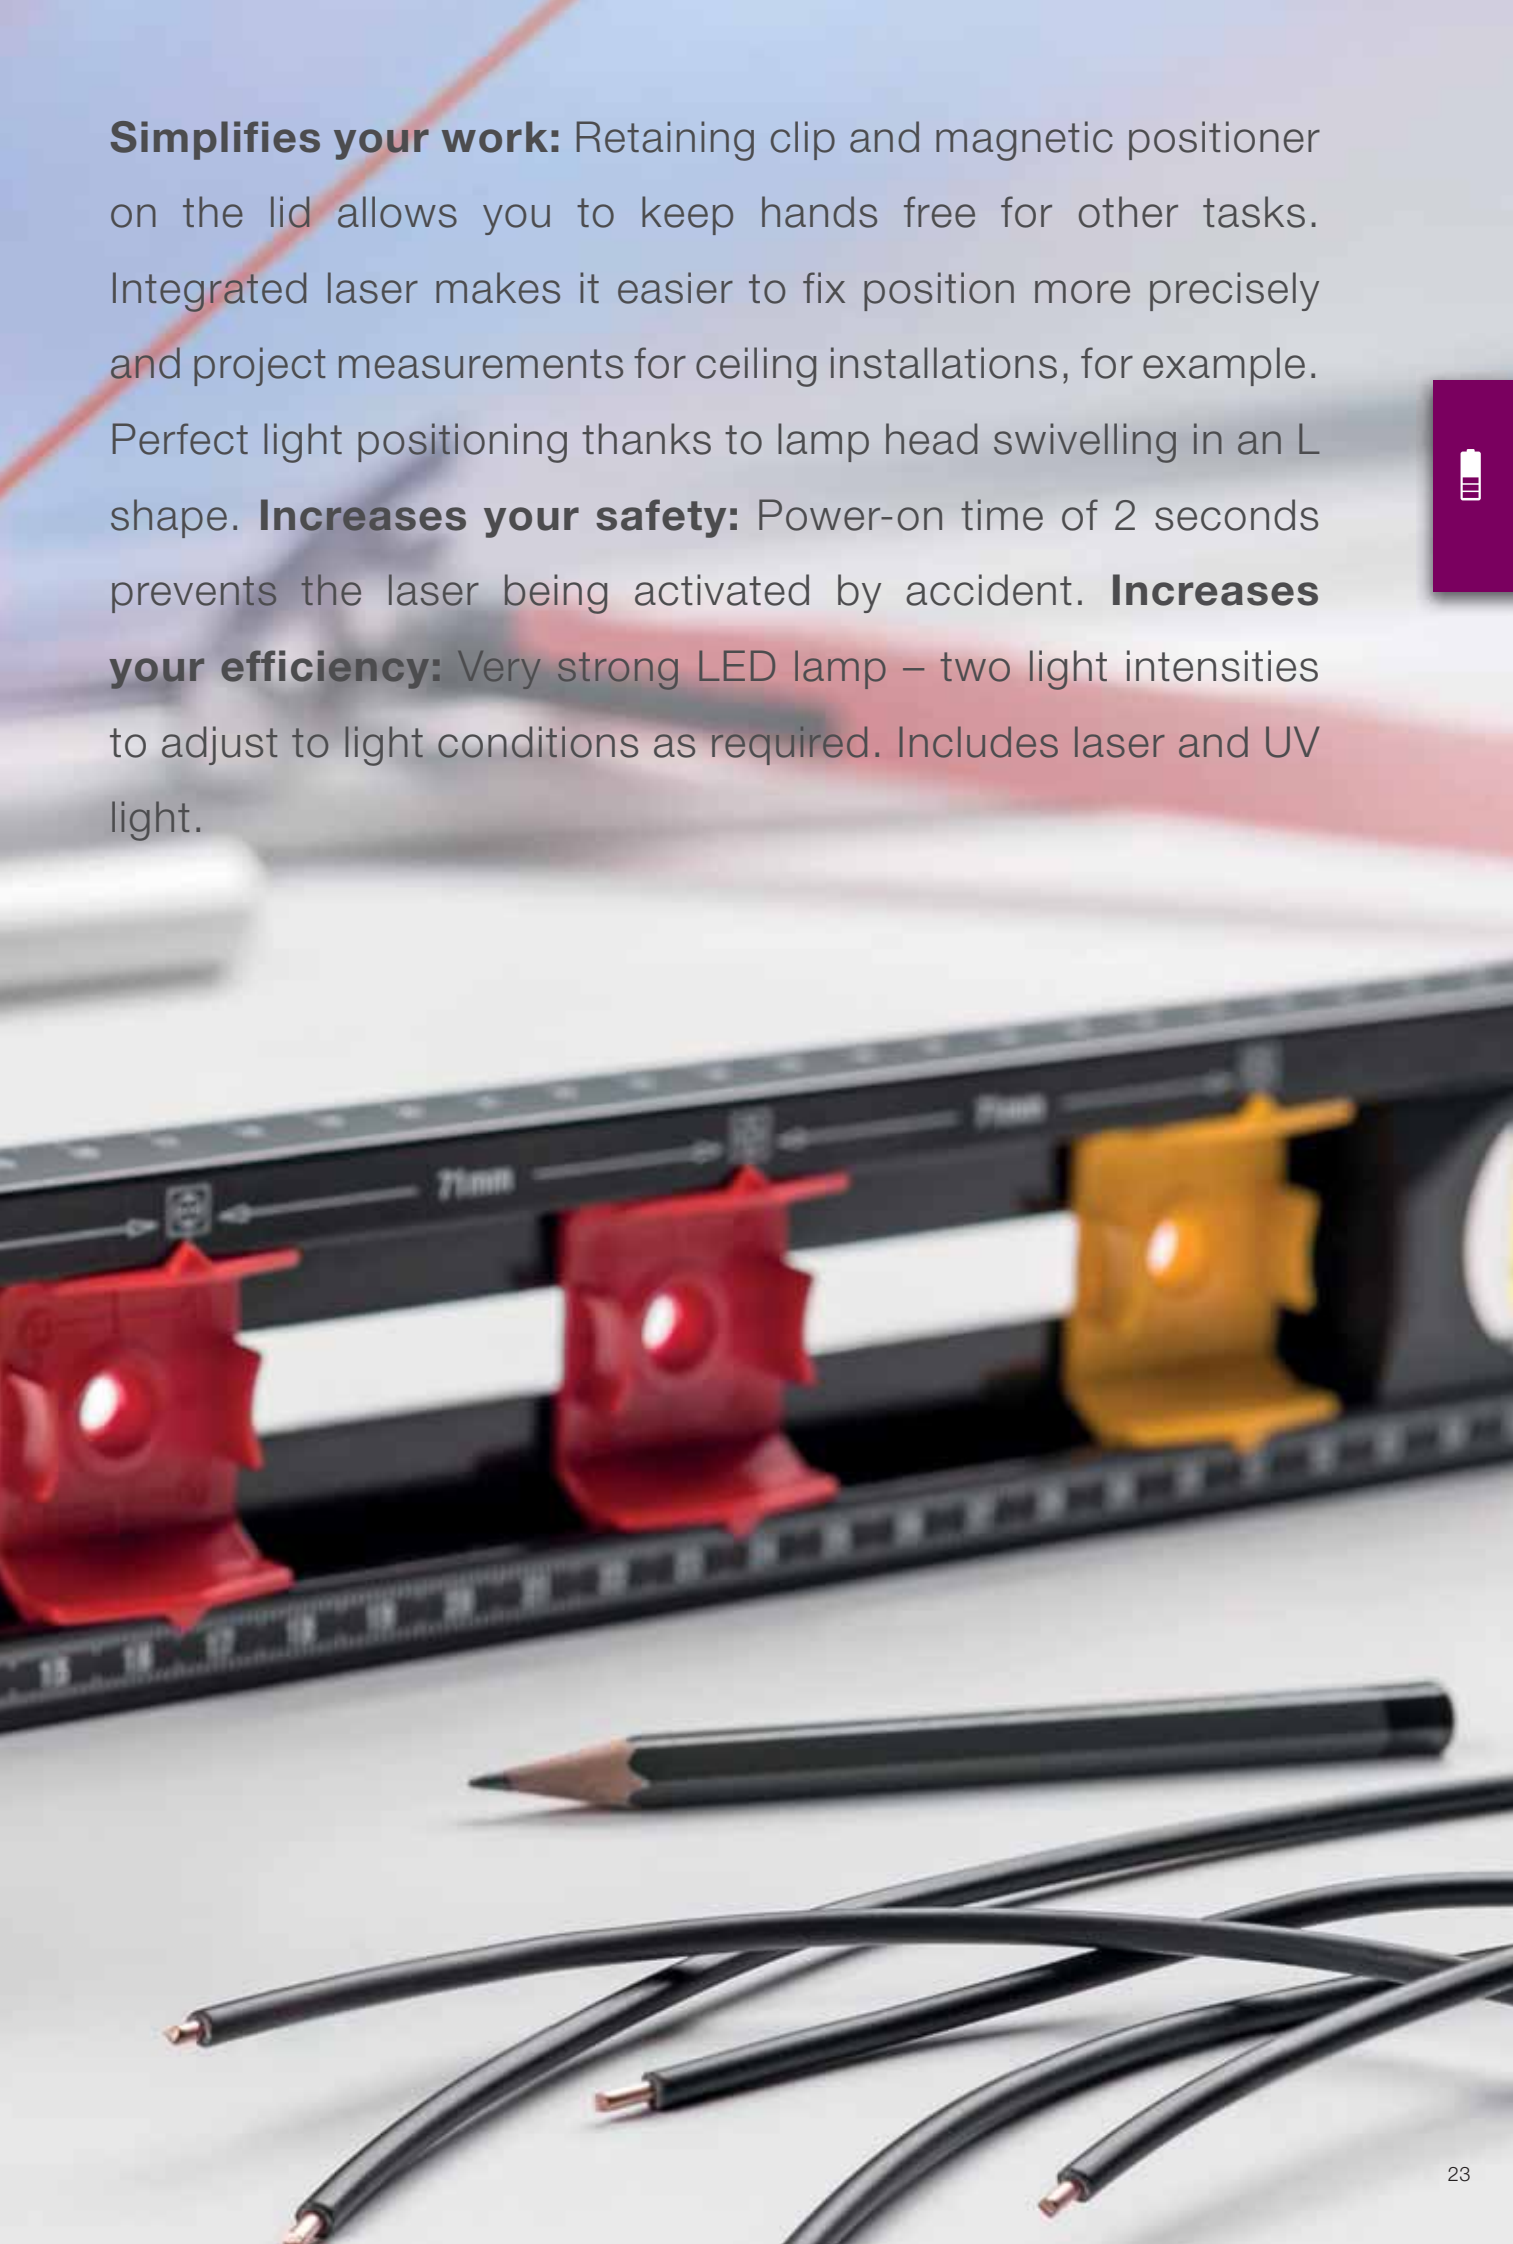
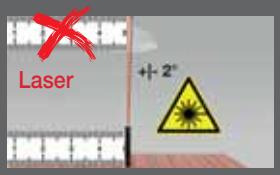
Simplifies your work: Retaining clip and magnetic positioner on the lid allows you to keep hands free for other tasks. Integrated laser makes it easier to fix position more precisely and project measurements for ceiling installations, for example. Perfect light positioning thanks to lamp head swivelling in an L shape. **Increases your safety:** Power-on time of 2 seconds prevents the laser being activated by accident. **Increases your efficiency:** Very strong LED lamp – two light intensities to adjust to light conditions as required. Includes laser and UV light.



Flashlight with LED, laser and UV light

Universal work tool with integrated laser, UV light and LED light.

- Optimum positioning and variable light direction thanks to the magnetic base and swivel head.
- The installation position can be projected directly from the middle of a table when fitting lights to the ceiling.
- The integrated UV light is ideal for finding misplaced coloured fluorescent Wiha tools and for technical inspections.



Torque QuickCheck

Wiha Torque QuickCheck

- The Wiha torque screwdriver can quickly and easily test torque screwdrivers to check the precision of the configured torque value before each use.
- Checking tools regularly ensures reliable, precise work.
- The device offers user-friendly operation, clear test readings and easy to understand LED traffic light signals.
- Thanks to a compact, handy shape, it is the ideal companion when out on jobs.
- Suitable for all Torque Vario®-S and iTorque® torque screwdrivers whose torque range included 2.8 Nm.

VDE-certified tools

Insulated tools are essential for all work on or around live components.

- Wiha VDE-tested tools are subject to stringent safety test procedures.
- All tools with the special marking have been tested at 10,000 V AC and are therefore approved for use at 1,000 V AC and 1,500 V DC.
- Certified by the VDE Testing and Certification Institute and individually tested according to the international standard IEC 60900.

The following equipment is required for all work on or around live components and should be appropriate for the specific task

- insulating personal protective equipment
- insulating safety mechanisms
- insulated tools

Before starting work, you must disconnect all active, live components of electrical machines and equipment and ensure that they remain disconnected while you carry out the work.

This is achieved by complying with the five safety rules:

- disconnect
- secure against reconnection
- ensure power is switched off
- earth and short-circuit
- cover or block off adjacent live components

Needle nose pliers Inomic® VDE

Z 06 0 16

1000 V IEC 60900

Product video:

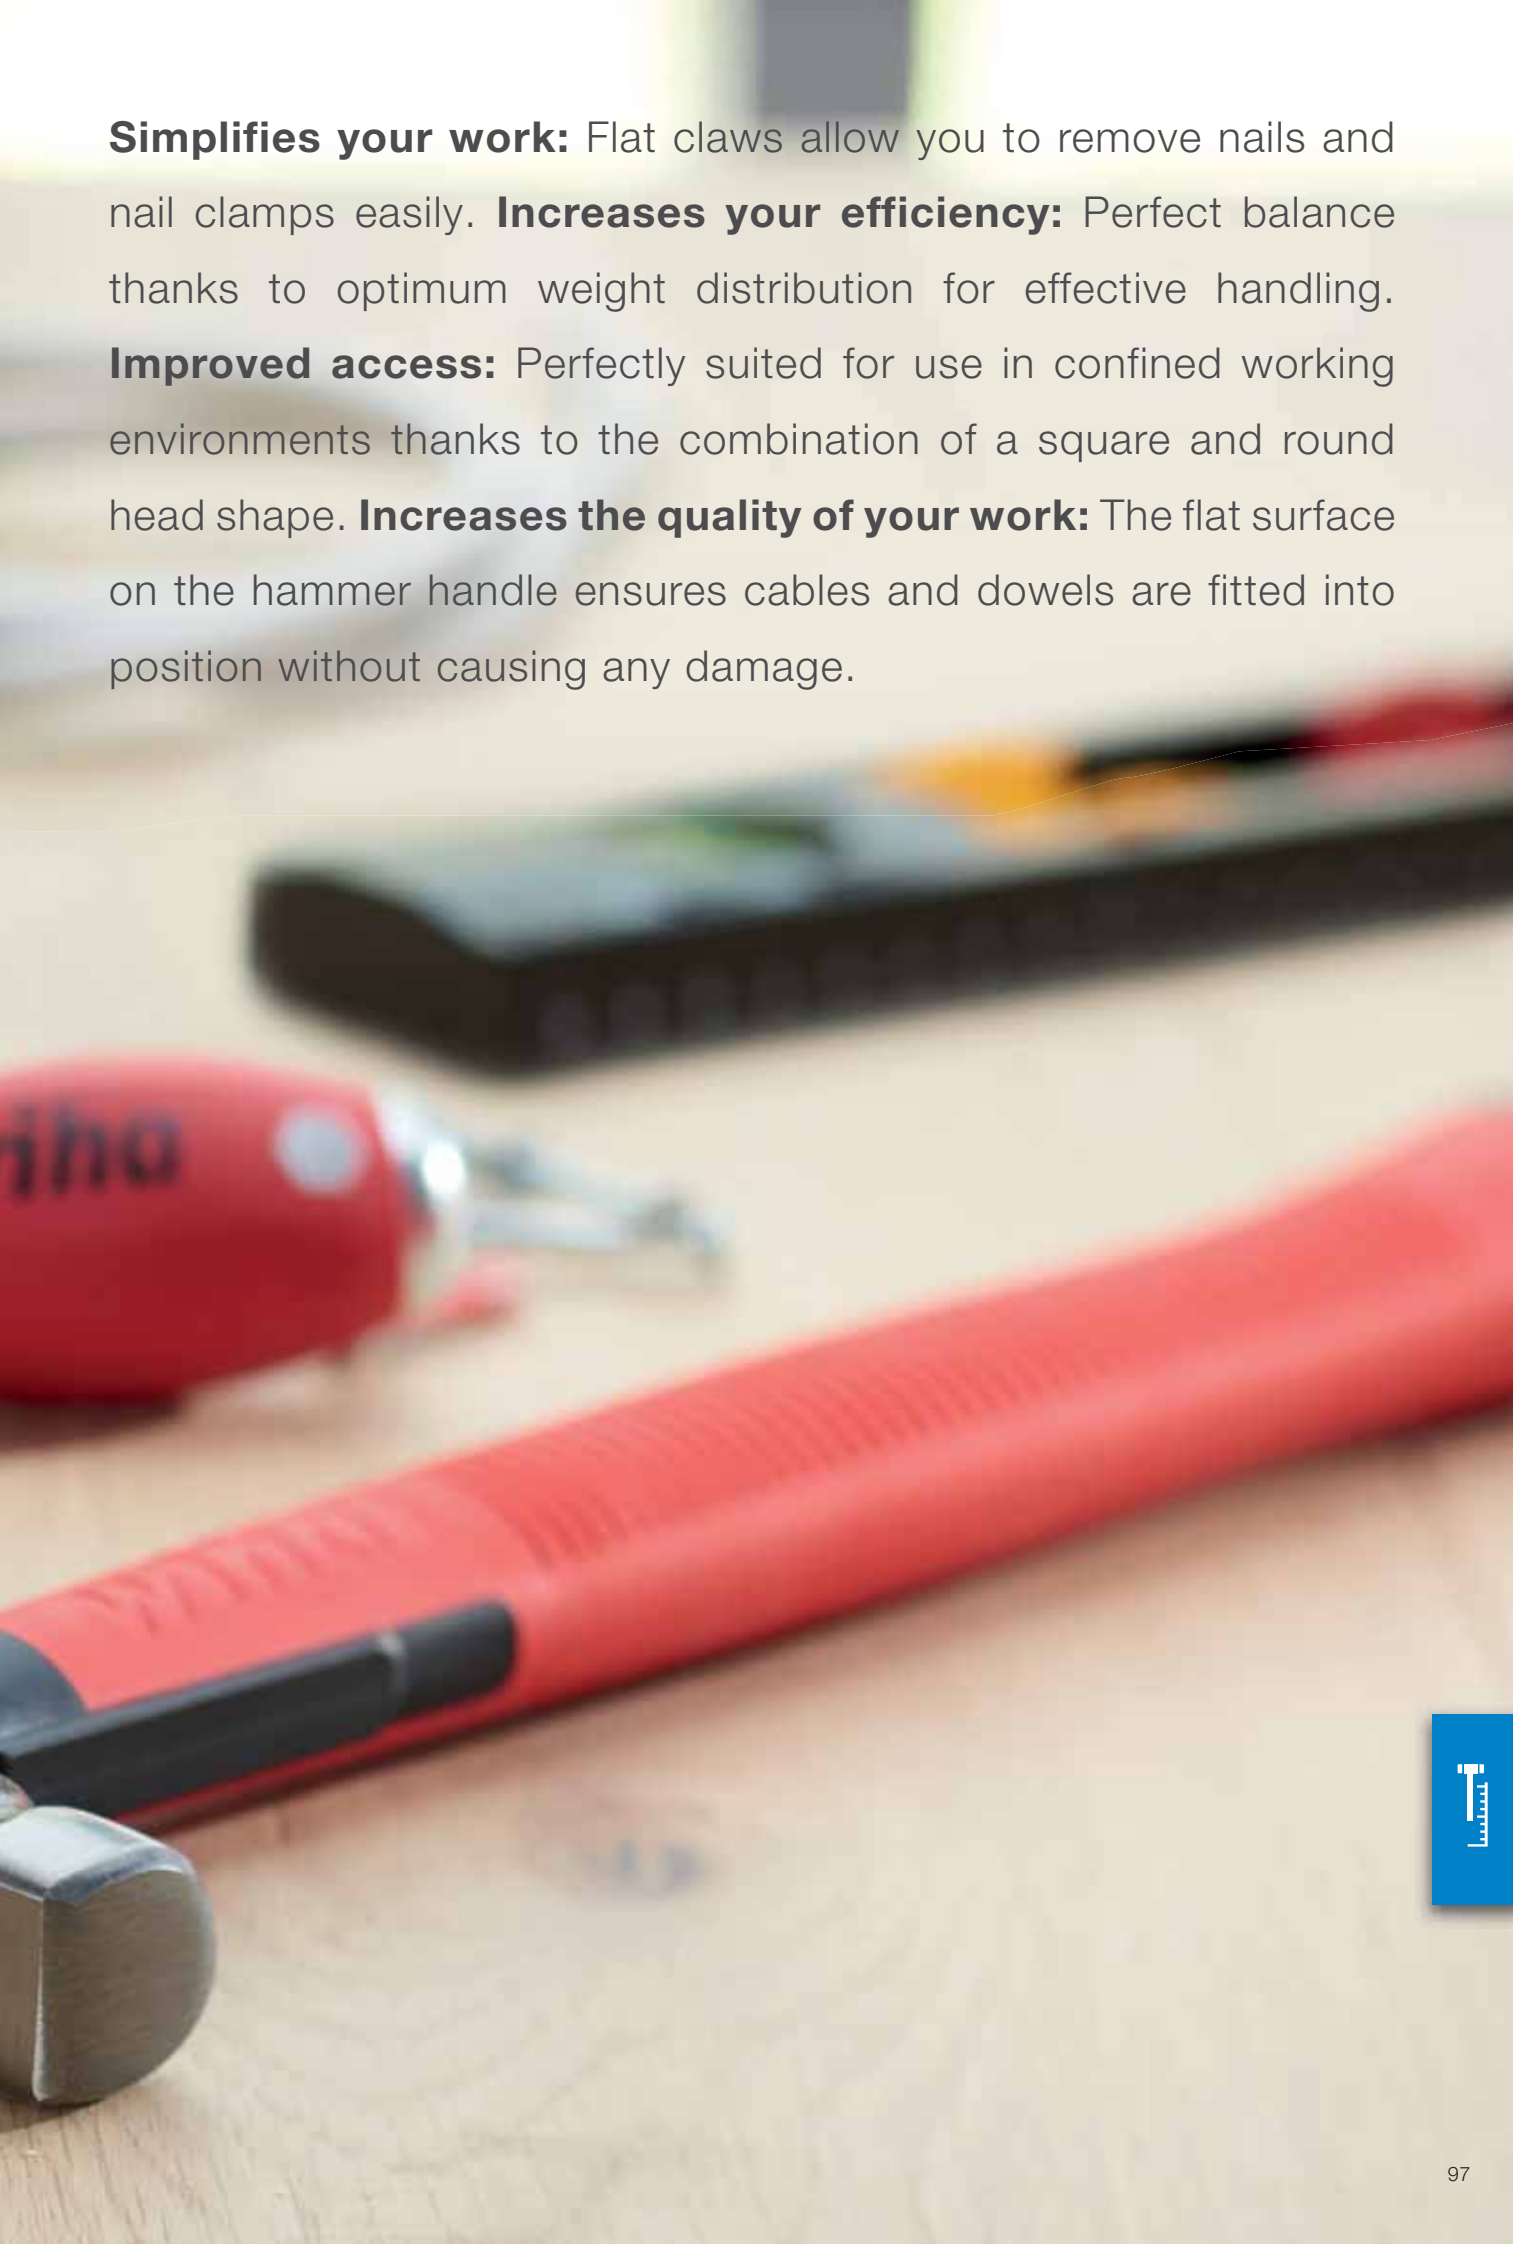
Simplifies your work: Flat claws allow you to remove nails and nail clamps easily. **Increases your efficiency:** Perfect balance thanks to optimum weight distribution for effective handling. **Improved access:** Perfectly suited for use in confined working environments thanks to the combination of a square and round head shape. **Increases the quality of your work:** The flat surface on the hammer handle ensures cables and dowels are fitted into position without causing any damage.



Soft-faced hammer set Safety

832 B8

Meets your requirements: Hammer components in a practical Wiha safety set with replaceable hammer heads of various degrees of hardness for all applications. **Simplifies your work:** Makes work easier, optimum impact effect and less effort needed. Each hammer component is available individually as a spare part. **Increases your efficiency:** Perfect finishing on rough edges thanks to the square hammer face with 27% more impact surface.

Soft-faced hammer set Safety with assorted hammer faces, 8-pcs. in box
Order-No. 28050

The perfect complement:

L-key set in ErgoStar holder
Order-No. 41980
More information: Page 196

No-recoil soft-faced hammer

- The special metal filling in the hammer head prevents recoil.
- Approx. 25% more hammer head mass provides additional power.
- Preserves delicate surfaces and edges through high-impact effect.

Simplifies your work: Comfortable measurement in different when viewed from above. **Saves space:** Perfectly portable; fits 4 flush boxes. **Increases your efficiency:** Both bubbles can be

work positions thanks to the ingeniously positioned scales, even into Wiha cases. **Saves time:** Variable distance marks for up to seen easily even from an acute angle.

1000 V

SoftFinish® dowel racket set with dowels

- Makes it easier to insert dowels and saves valuable working time.
- Ensures dirt- and dust-free work compared to machines.
- Galvanic separation between the blade and solid steel cap protects against electric shock.
- Perfect for portable use since you can make dowel holes anywhere at any time at the strike of a hammer.

Electrician's hammer

- With its optimally uniform weight distribution, this hammer ensures perfect balance, delivering impact and fatigue-free work.
- Its flat claws make it easier to remove fastening components such as nail clamps, even from difficult-to-access spots.
- Optimum access into corners and confined spaces thanks to U-shaped striking surface.
- The flat hammer handle lower surface acts as a soft-faced hammer, ensuring components such as cables and dowels are fixed into position without causing damage.

Electrician's spirit level, 40 cm

- Quick, easy marking of positions for up to four flush boxes in just one simple work step thanks to the integrated marking points.
- The continuous housing allows users to mark lines without interruption.
- An additional scale on the upper surface ensure precise measurement even when viewing from above.
- The bubbles are clearly visible, even from a sharp angle.
- The level is perfectly suitable for portable use thanks to its compact design.

Ranges
Designed for those who work with it.

The experiences of the user are taken into account right from the product development stage at Wiha tools. This ensures high-quality tool sets are designed for mechanics, electricians and electronics technicians which have been specifically compiled for their particular requirements and applications. Neatly stored and clearly organised in robust, compact tool bags, tools are ready at hand, ensuring work is completed easily and efficiently.

Wiha tools prove to be very handy, essential companions stored in a Wiha tool case, where the limitations of conventional tool cases have been eliminated: thanks to its practical tool pockets and extra storage space for small parts, the Wiha tool case provides simple, strain-free transport of your tools, offering greater convenience to make your work easier in every respect.

INFOBOX:

VDE-certified tools

Wiha VDE-tested tools are subject to stringent safety test procedures.

All tools with the special marking have been tested at 10,000 V AC and are therefore approved for use at 1,000 V AC and 1,500 V DC.

The following equipment is required for all work on or around live components and should be appropriate for the specific task

- insulating personal protective equipment
- insulating safety mechanisms
- insulated tools

Before starting work, you must disconnect all active, live components of electrical machines and equipment and ensure that they remain disconnected while you carry out the work.
This is achieved by complying with the five safety rules:

- disconnect
- secure against reconnection
- ensure power is switched off
- earth and short-circuit
- cover or block off adjacent live components

Certified by the VDE Testing and Certification Institute and individually tested according to the international standard IEC 60900.

INFOBOX:
OptiGrip

Wiha OptiGrip – optimal grip due to newly designed gripping surfaces

- A firm hold: The „triple-point support“ protects the workpiece from twisting or slipping.
- Highly effective: Optimum grip even with large jaw opening – and at the same time significantly less force needed.
- A wide selection: Now in standard Wiha combination pliers and high leverage combination pliers.

INFOBOX:

Electrostatic conductive ESD tools

Sensitive, electronic components can be damaged even at a very low voltage.

- Dissipative tools by Wiha discharge the electrostatic energy in a controlled, safe manner.
- ESD tools meet the ESD Standard IEC 61340-5-1.
- ESD tool handles have a surface resistance of 10^6 -10^9 Ohm.

Electro
Safety for professionals.

With the speedE® e-screwdriver, Wiha is revolutionising the screwdriver market. Whether handling delicate fastenings, long screws or very many screws, professionals have no trouble working with the e-screwdriver. The material protection function in particular makes the speedE® unique: At 0.4 Nm the electrical assistance stops automatically and allows the user to finish tightening the screw carefully by hand. In combination with the VDE certified slimBits the speedE® offers electricians full protection during their daily work.

The swivelling Wiha flashlight features an integrated laser, UV light and LED light with two lighting levels.

With Torque QuickCheck, Wiha is bringing the first portable quick tester for regular checks on torque tools onto the market, thus guaranteeing safe and precise work.

41286	100 / 310 lm	Class 2	390 - 400 nm	3 x AAA batteries	x	5

INFOBOX:

Flashlight with LED, laser and UV light

- Universal work tool with integrated laser, UV light and LED light.
- Optimum positioning and variable light direction thanks to the magnetic base and swivel head.
- The installation position can be projected directly from the middle of a table when fitting lights to the ceiling.
- The integrated UV light is ideal for finding misplaced coloured fluorescent Wiha tools and for technical inspections.

Torque QuickCheck torque testing device

with adapter blades and batteries in box **2909101**

Order-No.	Nm	±%	SB	
42086	2,8	2	x	1

INFOBOX:
Torque QuickCheck

Wiha Torque QuickCheck

- The Wiha torque screwdriver can quickly and easily test torque screwdrivers to check the precision of the configured torque value before each use.
- Checking tools regularly ensures reliable, precise work.
- The device offers user-friendly operation, clear test readings and easy to understand LED traffic light signals.
- Thanks to a compact, handy shape, it is the ideal companion when out on jobs.
- Suitable for all Torque Vario®-S and iTorque® torque screwdrivers whose torque range included 2.8 Nm.

Screwdrivers

We have the know-how at the tip of our fingers.

Unlike many standard tools available on the market, Wiha screwdrivers are optimally designed for users' requirements. Thanks to Wiha's screwdriver handle size concept, four handle sizes and lengths, optimally adapted to their specific fastening or work task, ensure health-friendly work practices. With SoftFinish, Wiha became the world's first and only hand tool manufacturer to have products honoured with the renowned AGR quality seal - a seal of approval accepted by medical professionals and officially recommended by doctors and therapists. Wiha screwdrivers featuring SoftFinish are available for dry applications, damp and oily applications and as VDE-certified, insulated screwdrivers for use when working on live parts..

Wiha is the world's first hand tool manufacturer to receive AGR (Association for healthy backs) certification for its Inomic pliers and ergonomic screwdriver handle size concept, a seal of approval accepted by medical professionals and officially recommended by doctors and physiotherapists.

INFOBOX:
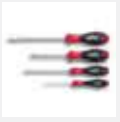
Handle size concept



Wiha SoftFinish® handle sizes

- Every Wiha handle optimally balances guidance, speed and torque for the respective fastening task.
- Quick-turning - Motor skills are consistently taken into consideration.
- Maximum power transmission: comfortable and loss-free transmission of physical strength, even during intensive fastening.
- The power-turning and quick-turning zones (length) vary significantly over the four handle sizes in various forms.
- The Wiha SoftFinish screwdrivers enable work that is kind on the hands and muscles and is therefore recommended by doctors and therapists from the AGR.

INFOBOX:
VDE-certified tools

Wiha VDE-tested tools are subject to stringent safety test procedures.

All tools with the special marking have been tested at 10,000 V AC and are therefore approved for use at 1,000 V AC and 1,500 V DC.

The following equipment is required for all work on or around live components and should be appropriate for the specific task

- insulating personal protective equipment
- insulating safety mechanisms
- insulated tools

Before starting work, you must disconnect all active, live components of electrical machines and equipment and ensure that they remain disconnected while you carry out the work.
This is achieved by complying with the five safety rules:

- disconnect
- secure against reconnection
- ensure power is switched off
- earth and short-circuit
- cover or block off adjacent live components

Certified by the VDE Testing and Certification Institute and individually tested according to the international standard IEC 60900.

DIN ISO 2380.

INFOBOX:

Solid steel cap and hexagon head

- The solid steel cap at the end of the screwdriver handle enables targeted hammering, e.g. to loosen jammed screws.
- The direct connection of the solid steel cap to the blade means that the impact energy is transmitted without any loss.
- Blade includes a hexagon bolster for using a set of spanners for additional torque.

INFOBOX:

Wiha MicroFinish screwdriver

The specialist for wet and oily applications.

- Due to the micro-fine surface structure of the screwdriver handle, the user can gain an optimal hold, even with oily or wet hands.
- The position of the soft and hard zones on the handle also supports the perfect grip for quick and powerful turning.

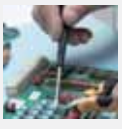
INFOBOX:

Electrostatic conductive ESD tools



Sensitive, electronic components can be damaged even at a very low voltage.

- Dissipative tools by Wiha discharge the electrostatic energy in a controlled, safe manner.
- ESD tools meet the ESD Standard IEC 61340-5-1.
- ESD tool handles have a surface resistance of 10^6 -10^9 Ohm.

Torque screwdriver
Controlled power for greater security.

The correct torque prevents damage to materials, eliminates the need for retouching and protects against warranty claims. This makes fully certified Wiha torque tools essential for mechanics, electricians and electronics technicians as they combine precision with security: with a release accuracy of +/–6 % for the pre-set scale value, Wiha torque screwdrivers satisfy standard precision requirements.

Torque tools with fixed settings increase process reliability while tools with variable settings are particularly ideal for mobile use. A special interchangeable blade system offers interchangeable blades with different drives. Guaranteed individual item testing using the manufacturer's inspection process and individual item marking with an identification number attest to the high quality and manufacturing standard of the tools.

VDE-certified tools

Wiha VDE-tested tools are subject to stringent safety test procedures.

All tools with the special marking have been tested at 10,000 V AC and are therefore approved for use at 1,000 V AC and 1,500 V DC.

The following equipment is required for all work on or around live components and should be appropriate for the specific task
- insulating personal protective equipment
- insulating safety mechanisms
- insulated tools

Before starting work, you must disconnect all active, live components of electrical machines and equipment and ensure that they remain disconnected while you carry out the work.
This is achieved by complying with the five safety rules:
- disconnect
- secure against reconnection
- ensure power is switched off
- earth and short-circuit
- cover or block off adjacent live components

Certified by the VDE Testing and Certification Institute and individually tested according to the international standard IEC 60900.

INFOBOX:

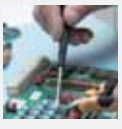
Electrostatic conductive ESD tools



Sensitive, electronic components can be damaged even at a very low voltage.

- Dissipative tools by Wiha discharge the electrostatic energy in a controlled, safe manner.
- ESD tools meet the ESD Standard IEC 61340-5-1.
- ESD tool handles have a surface resistance of 10^6 -10^9 Ohm.

Multitools
Many talents in the minimum space.

Fewer tools mean less load, better handling and efficient work. The more a tool can do, the better: Wiha multitools are compact, versatile tools which save space and and reduce overall weight, making them the perfect portable companion.

In the Wiha LiftUp magazine bit holder, the most commonly used bits are neatly stored in the handle, ensuring they are always ready for use and easy to handle. The Wiha reversible blade system offers a variety of interchangeable blades, the lengths of which can be adjusted as required. The small, compact Wiha PocketStars contain the most commonly used L-keys - indispensable helpers for all equipment. The Wiha Stubby magazine combines six drive formats in one, allowing completely unrestricted access to all confined spaces thanks to its extremely short screwdriver handle.

INFOBOX:
LiftUp 26one®

Most of the world's common drives in one tool!

- The LiftUp 26one® has 13 double bits; 12 in the magazine and 1 double bit in the bit holder.
- The bit magazine opens out at the press of a button, enabling the removal of the bits.
- Unlimited access to low-lying screws thanks to the automatically locking SuperSlim bit holder.
- Powerful screw fastening or loosening thanks to the large screwdriver handle.

L-keys
Difficult to access - easily solved.

Wiha L-keys are essential for all users who are faced with a screw fastening task in difficult work conditions. For difficult-to-access screws Wiha L-keys with a shortened L-key arm prove themselves to be ideal . The risk of injury is significantly reduced as the hand-working space is increased by over 30%.

Wiha ball-end tools enable fastening at angles of up to 25° per side. The risk of an accident is reduced since the tool does not slip out of the screw. Screws made of steel and non-magnetic materials are securely held in any position with the Wiha MagicRing and MagicSpring.

INFOBOX:
Tools in fluorescent colour

- Coloured bits and ErgoStar with coloured L-keys light up under a UV light.
- Ensuring misplaced tools are quickly and easily found again.
- The Wiha flashlight with a UV light makes the perfect complement to coloured fluorescent tools.

INFOBOX:
ErgoStar

The right L-key after just one turn.

- One turn of any L-key and all L-keys are ready for removal.
- Solid stopping point for fixing L-keys in the holder.
- Innovative clamping ensures L-keys are held firmly in both a closed and open position.
- Compact design saves space on the work bench or in the toolbox.
- Wall bracket for practical storage of the ErgoStar holder in the workshop.

INFOBOX:

L-key with short shaft

Especially for hard-to-reach screws and confined spaces

Improved accessibility thanks to a 60% reduction in length of the short L-key side.

- Increase in the hand working space of over 30% and thus a reduction of the risk of injury to the knuckles and fingertips thanks to a 95° bend of the L-key.
- Ball end geometry enables fastening at an angle of up to 25°.

INFOBOX:
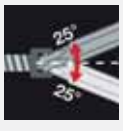
TORX® ball end



Wiha TORX® ball end

With optimised TORX® ball end geometry

- Increased strength thanks to the special cold forming on a system developed by Wiha especially for this purpose.
- Allows fastening and unfastening at angles up to 25°.
- Simple insertion of the tool/bit and fastening/ unfastening, especially in hard-to-reach positions.
- Broad product range: As an L-key, as a bit and as a SoftFinish® screwdriver.

Which drives are used for each individual product? Page 304

Bits
The indispensable three.

Which machine? Which application? Which bit? The revolutionary Wiha bit concept puts an end to any confusion and presents three bit types which can cover all areas of use.

Only the screw shape is crucial for selecting the bit. The Y bit is ideal for fastening Y-shaped screws with an angle no greater than 90° between the thread and screw head. The T bit is used for T-shaped screws at a 90° angle. If you need to fasten both screw types, then the TY bit is the right choice since this universal bit is suitable for all type of fastenings.

A selection of different bit holders and bit boxes such as the BitBuddy® and XLSelector ensures optimum usage of bits.

Application	Bits			
For all screw types	**BitBuddy® TY bit set, 49 mm** Page 222 	**BitBuddy® TY bit set, 29 mm** Page 223 	**TY bit set 49 mm** Page 222 	**TY bit set 29 mm** Page 224

INFOBOX:
BitBuddy 29

Easy, single-hand operation.

Attaching:

- Bits are directly picked up with the machine from the BitBuddy.

Work:

- Gets your fastenings done.

Storing

- Bits are easily returned to the BitBuddy, by pressing on the red bit strip.
- With magnetic bit holder for a rapid bit change.
- BitBuddy is always at hand - easily fits into trouser pockets or onto the belt clip.

Which drives are used for each individual product? Page 304

INFOBOX:

Wiha TY bit concept

- Bits quickly and easily selected thanks to the screw head shape.
- The T bit is ideal for fastening T-shaped screws with an angle of 90°.
- The Y bit is ideal for fastening Y-shaped screws with an angle not equal to 90°.
- Universal in its use, the TY bit is suitable for all types of screws, no matter whether they feature a Y-shaped or T-shaped screw head.

INFOBOX: Ball end hex

Wiha hexagonal ball end

- The ball end can be rotated by up to 25° in both clockwise and anti-clockwise direction.

INFOBOX: MagicRing®

Wiha MagicRing®

- Spring steel ring reliably holds hex screws in place
- An innovation, which will benefit each user.

INFOBOX: TORX® tamper-resistant safety profile

- This safety profile is used to hinder unwanted access to equipment such as intercoms, thermostats and night-storage heaters.
- You can fasten the Torx® tamper resistant profile with both Torx® H screws and normal Torx® screws.

INFOBOX:
TORX® ball end

Wiha TORX® ball end

- With optimised TORX® ball end geometry
- Increased strength thanks to the special cold forming on a system developed by Wiha especially for this purpose.
- Allows fastening and unfastening at angles up to 25°.
- Simple insertion of the tool/bit and fastening/ unfastening, especially in hard-to-reach positions.
- Broad product range: As an L-key, as a bit and as a SoftFinish® screwdriver.

Which drives are used for each individual product? Page 304

INFOBOX:
CentroFix Force

- CentroFix Force
- Suitable for all bits with 1/4" hex drive style C6.3 and E6.3.
- SelfLock: The bit is locked mechanically and held securely when inserted.
- EasyOut: When unlocked, the bit moves into the ideal removal position.

INFOBOX:
CentroFix SuperSlim

- Up to 30% reduced outer diameter compared to "conventional" quick release holders.
- Improved screw accessibility in confined holes.
- SelfLock: The bit is locked mechanically and held securely when inserted.
- EasyOut: When unlocked, the bit moves into the ideal removal position.

INFOBOX:
MagicFlip Force

- Facilitates the fastening of long wood screws.
- Optimal holding force thanks to extremely powerful Neodym ring magnet.
- FlipBack: The actuating sleeve automatically springs back during recessing.
- Magnet On/Off: The ring magnet can be "deactivated" by pushing the actuating sleeve back.

Pliers

A cut above the rest for your health.

Wiha pliers combine high-quality materials with ergonomic comfort. Precise interaction between the joints and the exact workmanship of the blades and gripping surfaces ensure optimum functionality. Ergonomically designed and crafted to a high quality standard, they are comfortable to use, causing less body fatigue and thus making work more efficient.

The “OptiGrip” triple-point support design for combination and high-leverage combination pliers ensure an optimum, secure hold when handled. The circlip pliers from the Classic Series with their MagicTips® precision tips made of high-performance steel provide added safety and stability. With its angled plier shape, the Wiha Inomic® VDE product line is kind to the user's joints, muscles and tendons. Wiha also supplies suitable tools for stripping, skinning and crimping.

INFOBOX:
VDE-certified tools

Wiha VDE-tested tools are subject to stringent safety test procedures.

All tools with the special marking have been tested at 10,000 V AC and are therefore approved for use at 1,000 V AC and 1,500 V DC.

The following equipment is required for all work on or around live components and should be appropriate for the specific task

- insulating personal protective equipment
- insulating safety mechanisms
- insulated tools

Before starting work, you must disconnect all active, live components of electrical machines and equipment and ensure that they remain disconnected while you carry out the work.
This is achieved by complying with the five safety rules:

- disconnect
- secure against reconnection
- ensure power is switched off
- earth and short-circuit
- cover or block off adjacent live components

Certified by the VDE Testing and Certification Institute and individually tested according to the international standard IEC 60900.

INFOBOX:

OptiGrip

Perfect Grip

Wiha OptiGrip – optimal grip due to newly designed gripping surfaces

- A firm hold: The „triple-point support“ protects the workpiece from twisting or slipping.
- Highly effective: Optimum grip even with large jaw opening – and at the same time significantly less force needed.
- A wide selection: Now in standard Wiha combination pliers and high leverage combination pliers.

INFOBOX:
Wiha Inomic®

Innovative and ergonomic.

- The angled shape of the Inomic® pliers enables work which is kind on the hands and muscles and is therefore recommended by doctors and therapists from the AGR.
- Improved grip control due to highly sensitive opening spring.
- Like an extension of your own hand: gripping is simple, firm and safe.
- Pliers can be transported and stored in a closed position, thanks to a locking mechanism.

INFOBOX:

Stripping tool, automatic up to 16mm²

- These pliers can handle a wide range of cables, thus combining two pairs of pliers in one.
- The supplied damper can be used to lessen recoil caused by larger cable gauges, such as those greater than 6 mm², thus helping to protect wrists.
- Precise cutting to length thanks to adjustable longitudinal stop.
- Integrated hand protection along the cutting edge guards against injury.

INFOBOX:
Plier wrench

- Required width setting directly on the work piece with no need to press any buttons
- Ratchet principle allows users to fasten screws rapidly with a simple glide.
- Thanks to its slim design and button-free setting, it is ideal for use in tight spaces.
- Smooth, parallel-acting jaws prevent damage on sensitive surfaces.

INFOBOX:

Electrostatic conductive ESD tools

Sensitive, electronic components can be damaged even at a very low voltage.

- Dissipative tools by Wiha discharge the electrostatic energy in a controlled, safe manner.
- ESD tools meet the ESD Standard IEC 61340-5-1.
- ESD tool handles have a surface resistance of 10^6 -10^9 Ohm.

Striking and measuring tools.
Optimum force transmission

With optimally uniform weight distribution, the Wiha electric hammer strikes a perfect balance and is also eminently suitable for use in confined working environments. Removing nails and nail clamps as well as fixing cables and dowels into position without causing damage become extremely simple tasks. Wiha's scaled impact screwdriver blade ensures that the portable dowel racket makes a perfectly dimensioned dowel hole to the required depth anywhere at any time without making a mess, unlike power tools.

Wiha measuring tools prove to be further dependable helpers during electrical installation work. The Wiha electrician's spirit level allows users to easily mark spaces for up to four flush boxes. This spirit level stands out due to its effortless dimension measurement and perfectly visible bubbles.

INFOBOX:

Colour code system for Wiha hammer faces

Safety note:

- Always wear safety glasses and safety gloves when working with soft-faced hammers. Please observe the applicable national standards and regulations.
- Please observe the following tightening torques when replacing heads or handles:

Size 30 = 20 Nm
Size 40 = 40 Nm
Size 50 = 70 Nm
Size 60 = 70 Nm
Size 80 = 80 Nm

Hammer face	Range of uses
soft (blue)	for sensitive materials, such as those in furniture and interior construction, minor assembly. Material: elastomer.
medium soft (black)	for robust work, such as paving, tiling, dry wall installation. Material: rubber.
medium hard (yellow)	universal use, such as for tool and machine manufacture, car repairs, sheet metal and assembly work. Material: polyurethane.
hard (orange)	for high stress mechanical tasks such as assembly and dismantling work, building and construction work, repair work. Material: cellulose acetate.
very hard (white)	for high impact work, heavy industry and construction, mould construction, road construction, horticulture and landscaping. Material: polyamide.

Electrician's hammer

with 300 g hammer head, in blister pack **846**

Order-No.				
42071	23,9	283	500	4

INFOBOX:
SoftFinish® dowel racket set with dowels

- Makes it easier to insert dowels and saves valuable working time.
- Ensures dirt- and dust-free work compared to machines.
- Galvanic separation between the blade and solid steel cap protects against electric shock.
- Perfect for portable use since you can make dowel holes anywhere at any time at the strike of a hammer.

INFOBOX:
Electrician's hammer

- With its optimally uniform weight distribution, this hammer ensures perfect balance, delivering impact and fatigue-free work.
- Its flat claws make it easier to remove fastening components such as nail clamps, even from difficult-to-access spots.
- Optimum access into corners and confined spaces thanks to U-shaped striking surface.
- The flat hammer handle lower surface acts as a soft-faced hammer, ensuring components such as cables and dowels are fixed into position without causing damage.

INFOBOX:

Electrician's spirit level, 40 cm

- Quick, easy marking of positions for up to four flush boxes in just one simple work step thanks to the integrated marking points.
- The continuous housing allows users to mark lines without interruption.
- An additional scale on the upper surface ensure precise measurement even when viewing from above.
- The bubbles are clearly visible, even from a sharp angle.
- The level is perfectly suitable for portable use thanks to its compact design.

Notes

Legend

Drives

- Triangular nut
- Hex
- Square nut
- Hexagon socket
- Internal hexagon with drill hole (tamper-resistant)
- Tamper Resistant hex
- Countersink
- Combination drill bit
- Pentalobe PL
- Y-Type
- Phillips PH (cross-recessed)
- Pozidriv PZ (Phillips)
- Robertson
- Round tip
- Slotted
- Slotted nut
- SIT
- Spanner
- Twist drill
- Sliding sleeve
- Torq-Set®
- TORX®
- TORX® with drill hole (tamper-resistant)
- TORX PLUS®
- Tri-Wing®
- Multitooth
- Square reaming blade
- Xeno SL/PZ

Drives

- Square nut
- Square
- G7 drive system
- Threaded connector
- SDS-Plus®
- Hex

Screwdrivers [mm]

- Cut width
- Tip width
- Round blade dimension
- Hex blade
- Hex_bolster
- Scraper width
- Clip opening
- Tip width
- Head width, nut driver
- Blade length
- Shaft lengths
- Handle length
- Handle diameter
- Torque T-handle length
- Torque T-handle width
- max. Nm — Max. torque value [Nm]
- max. in.lbs. — Max. torque value [in.lbs]
- ±% — Accuracy [%]
- Cable key depth

L-keys [mm]

- Round blade dimension
- Hex blade
- Hex bolster
- Shaft lengths
- Blade length
- Side driver length T-handle
- Handle width
- Diameter

Bits [mm]

- Threaded connector
- Drill working length
- Screw size

Pliers [mm]

- Flat jaws
- Half round jaws
- Round jaws
- Cutter without bevel
- Cutter with small bevel
- Cutter with bevel
- Anvil cutter
- Center cutter
- Scissors cutter
- Front cutting edge in stripping pliers
- Ø mm — Max. diameter
- mm² — Max. cross-section
- Max. gripper pipe diameter
- Max. gripper width across flats
- External retaining ring
- Internal retaining ring
- Clamping range
- Opening width flat
- Cutting force
- with opening spring
- AWG — American Wire Gauge
- Saw blade length

Measurement tools [mm]

- Width of segments
- Colour
- Measurement capacity [mm]
- Measurement capacity in Inch

Electro

- Battery
- LED — LED lumens
- Laser light

Soft faced hammer [mm]

- Face diameter
- Hammer face width
- Hammer head width

General symbols

- g — Weight, g
- Diameter
- SB — Blister packed
- mm — Total length
- " — Total length in inch

TORX®, TORX PLUS®= Registered Trademarks of ACUMENT GlobalTechnologies B.V.
ACR/AOT, Tri-Wing®, Torq-Set®= Registered Trademarks of Phillips Screw Company
Pozidriv= Registered Trademark of European Industrial Services Ltd.

Legend

Ranges

- Case strength
- Wheel-along case
- Case shape
- Case suitable for transport by air

Elektro

- Torque safety check
- Saves time

Screwdrivers

- MagicRing®
- MagicSpring®
- Ball end can swivel up to 25°
- slimTECHNOLOGY

Torque

- Precision: ±6%
- Accuracy ±10%
- slimTECHNOLOGY

L-keys

- MagicRing®
- MagicSpring®
- Ball end can swivel up to 25°
- TORX® ball end; can swivel up to 25°
- Visible in UV light

Bits

- Suitable for impact screwdrivers
- Lifespan 120 times longer
- Visible in UV light

Pliers

- Cutting-to-length diameter
- Skinning diameter length
- Automatic skinning
- DynamicJoint®
- Heavy-duty diagonal cutters
- OptiGrip
- MagicTips®
- BiCut® Power
- TriCut
- Inomic®

Impact tools

- Optimum weight distribution
- Soft hammer end
- Levers out nail clamp

Measurement tool

- Fully encased
- Visible from just 10°
- Visible in UV light

General information

- Recommended for electricians – non-insulated
- VDE-tested and certified
- CE marking
- ESD electronics mark
